

Taubenheim Gelbvieh

32nd Annual Production Sale

**MONDAY
FEBRUARY 7, 2022
1:00 PM**

**SALE FACILITY AT THE RANCH
23685 SARTORIA RD. AMHERST, NE 68812**

Cattlemen and Cattlewomen,

It's that time of year again, and we want to begin by saying hello from all of us at Taubenheim Gelbvieh. With great pleasure we invite you to our 32nd Annual Production Sale at the ranch on Monday February 7th, 2022.

What a year 2021 was, we hope this catalog finds you healthy and in good spirits. To our valued repeat customers, we appreciate your continued support and to new customers, we hope you will find our cattle appropriate for your program. We promise to work hard to earn your business, and we will work even harder to make sure you are satisfied with our cattle.

At Taubenheim Gelbvieh we strive to make cattle that do more with less. For that reason, we are keeping our cowherd easy fleshing while adding pounds with increased muscle shape and natural thickness. It's a fact, using Gelbvieh influenced cattle will help you add the extra pounds needed to make up for an always fluctuating market.

This year we are offering a stout made set of bulls that are correct in their skeletal build, easy fleshing, and powerful. This is the most complete set of bulls from top to bottom that we have ever offered. You can look for our bulls to add pounds at weaning, increase feed efficiency, improve carcass quality, and add great maternal strength.

Calves are sired by a large selection of AI sires along with herdsires we have raised or purchased. Some of these sires include SAV Resource, Basin Payweight 1682, TAU Infinity 47C, TAU Leader 35C, EGL Lifeline B101. Our cowherd has been built through a strenuous selection process where we stack A.I and E.T. matings. In doing so, we give our customers the highest quality herdsires and replacement females.

This year we will be offering an impressive group of bred heifers. These females come right out of our replacement pen and they are a great opportunity for you to take some of our genetics back to your own herd. You are welcome to stop by and view the bulls or females at your convenience, and there will always be someone at the farm to assist you.

In the end, we are very proud of the bulls and heifers and what they have to offer. At Taubenheim Gelbvieh our goal has always been to satisfy the customer and help you make a profit. We plan to do that in 2022 with added pounds, improved carcass quality, decreased inputs through feed efficiency, and increased fertility.

We look forward to talking to you in the near future, and don't forget to mark your calendars for February 7th.

Thank you,
The Taubenheim's

Mike, Renee, Seth, Kale,
Sydney and Clay

**Welcome to the 32nd Annual
Taubenheim Gelbvieh Production Sale
Monday, February 7, 2022 1:00 p.m. (CST)
Sale Facility At The Ranch
23685 Sartoria Rd • Amherst, NE 68812**

**SELLING
111 Bulls 54 Bred Females**

HERD HEALTH

All bulls have had shots and been poured. Necessary health papers will be supplied with each sale animal.

TRUCKING

Free trucking on bulls of \$4,500 or more-- up to 350 miles, otherwise to central location.

Terms of Sale: Cash

TAUBENHEIM GELBIEH FIRST SEASON BREEDING GUARANTEE

Buyers of all bulls selling for \$4,000 or more injured the first breeding season, will have credit at the next sale at the value of the purchase price minus salvage value. Contact Taubenheim Gelbvieh promptly so the decision to return the bull to Taubenheim Gelbvieh or sold by buyer may be made. Breeding season is defined as the 90 day period following the first turnout of the bulls.

In the event of death of a bull during the first breeding season, a credit of 50% of the sale price will be applied at the next sale for a bull.

If you have a problem and are in need of a replacement for any reason, please contact Taubenheim Gelbvieh as we will be glad to be of service.

All announcements from block take precedence over all written material.

Registration papers available.

Retaining 1/2 semen rights on all bulls.

Can't make the sale? Busy during the sale?

Champion Pen of 3 Balancer Bulls -- 2021 Cattlemen's Congress

EPD Information

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

Milk (MILK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

Stayability (ST): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six years of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

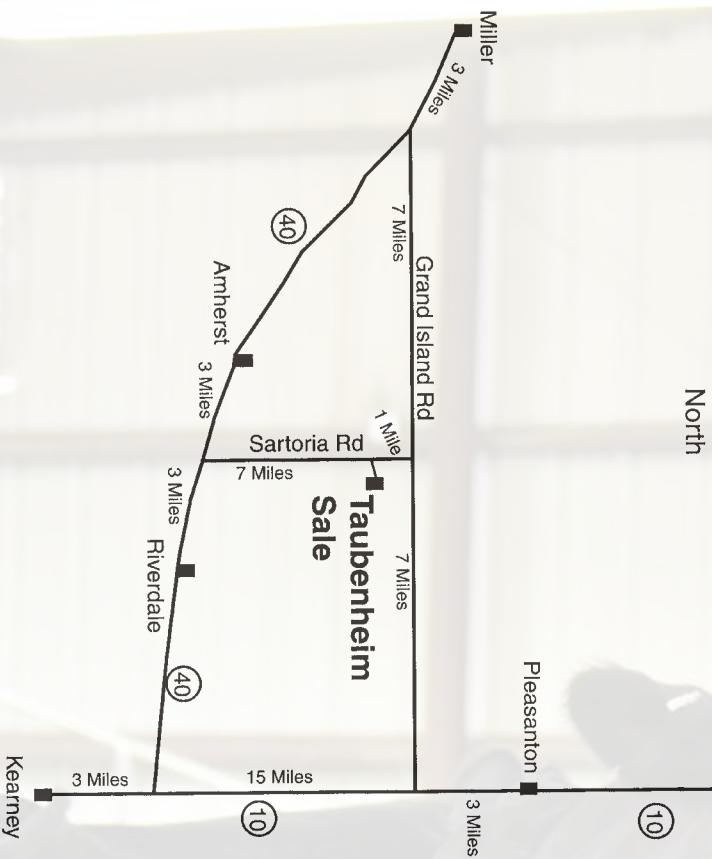

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (FT): Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

Total maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. As an index, this value is not reported with an accompanying accuracy. A greater TM value means a mother returns comparatively higher weaning weights on her calves. $TM\ Index = MK\ EPD + \frac{1}{2} WW\ EPD$.

FPI™: An economic selection index, which stands for feeder profit index, is designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on a grade and yield standpoint. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.
